Memorandum for Mr. William Eddy  
Special Assistant to Secretary of State for Research  
and Intelligence

Subject: Interview with CIG OF members of Special Missions to Foreign Areas

1. It is felt that benefit could be derived by CIG, in the interests of national security, from an interview with the senior members of special missions which are sent to foreign countries or areas under the auspices of the State Department.

2. This procedure is now being successfully carried out in the case of other officials of government agencies and it is considered desirable that these special mission personnel be included in that category.

3. It is therefore requested that an appropriate individual or individuals be directed to contact the Chief of the Presentation Division, CIG (Phone [redacted]) who will make the necessary arrangements for the interviews. Whenever possible, a short briefing upon departure of these officials by CIG would enhance the value of the interview upon their return.
